## Aviator Smart Watch Men's Watch, Silver

This watch successfully unites design and function. Its classic look makes the smartwatch a stylish companion on any occasion that looks good on the wrist thanks to an elegant leather strap. It connects easily to your smartphone and alerts you to incoming calls, SMS and new email. It also doubles up as a mobile calendar, counts steps and calories and monitors your sleep duration. The information is displayed on a small LED screen that blends in perfectly with the classic design.

Inspired by aviation

Flying has been the dream of humankind since the dawn of time and explains our fascination with aviation. Aviator watches unite the aspects that play a major role in aeroplane design: modern technology and an appealing look that hints at adventure and wanderlust. The Aviator brand is reminiscent of the long and exciting history of aviation, with each collection representing a different era. Aviator watches feature classic designs and state of the art technology that make them the perfect everyday companion.
